HW 4 Critique

1   REQUIREMENTS

I will use this section to lay out the directions and focuses of the Homework assignment.

The focus of Homework 4 was "splitting (atomizing) requirements statements and organizing them in a logical hierarchy," according to the assignment sheet. This included some focal points such as using a strong, active voice, atomizing each statement to contain "one and only one item per requirement statement, and writing measurable requirements.

2   DISCONNECTS

I will use this section to talk about what I did wrong in the Homework assignment.

The first mistake I made in this assignment is my use of passive voice in nearly all the requirement statements. I retyped the original homework assignment in Section 3 of this paper, and I will refer to that to point out my mistakes. For question 1,

3   ORIGINAL ASSIGNMENT

I will use this section to post my original assignment from last semester, in a more readable format.

1   QUESTION 1

1.1   THE SYSTEM MAY BE QUERIED.

1.1.1   The query may contain a user number

1.1.1.1   The query will report all equipment assigned to that user.

1.1.2   The query may contain a serial number.

1.1.2.1   The query will report the assignment for that computer.

1.1.3   The query will always show name, office, user number, serial number, and types.

1.1.4   If a user is not assigned, this is reported

1.1.5   If a computer is not assigned, this is reported

2   QUESTION 2

Usability
> The system must be able to be used by all employees with a user number.

Accuracy
> The system should reliably display the correct information, given a proper input.

Expandability
> The system should be able to add more features in the future.

4   CORRECTED ASSIGNMENT

I will use this section to post my new, corrected assignment.
